Marketing strategist who builds the systems behind enterprise campaigns: lead capture, account targeting, QA, and field enablement. Automates manual workflows and turns campaign data into attribution reporting.

## WORK EXPERIENCE

### Ad Ops Specialist

DoorDash, Sage Group, Los Angeles — Aug'25 – May'26

- Built an agentic monitoring system on Snowflake data that flagged campaign errors automatically, removing manual monitoring overhead across \$1M+ in active campaigns.
- Owned a \$2M+ enterprise campaign portfolio across ENT, CPG, and NV verticals, defining account targeting criteria and monitoring delivery health to prevent zero-delivery scenarios.
- Drove \$2M+ in spend efficiency across DoorDash and Merchant-funded budgets by optimizing pacing, bid performance, and signals, maximizing delivery ROI and preventing underspend at scale.
- Served as cross-functional point-of-contact for enterprise escalations, partnering with account teams and writing the FAQs and objection-handling docs that cleared recurring setup blockers.

### Growth Marketing Specialist

Field Nation, Seattle — Dec'23 – Jul'24

- Overhauled Salesforce and HubSpot by deploying custom automations and streamlined workflows, improving pipeline visibility and forecasting accuracy by 30%.
- Led cross-platform data standardization across CRM and marketing systems, driving a 22% increase in lead conversion rates through improved data integrity and continuous monitoring.
- Automated ZoomInfo enrichment across Outreach and Salesforce for real-time contact updates, resulting in a 20% lift in email deliverability and more efficient sales prospecting.
- Designed campaign influence models and the performance reporting behind them, lifting ROI by 8% and giving leadership a read on which programs earned their spend.

### Marketing Automation Specialist

PitchBook Data, Seattle — Aug'21 – Aug'23

- Redesigned the end-to-end lifecycle funnel and rolled it out in phases, writing the in-product onboarding copy and tracking adoption to a 15% gain in lead-tracking accuracy.
- Built scalable automations in Python, Marketo, and Salesforce, improving operational efficiency by 20%.
- Executed daily campaigns to 60K+ contacts with 98% deliverability and 17% open rates, and implemented database health assessments that lifted open rates a further 8%.
- Deduplicated a 4M+ record Marketo database, lifting email performance 12% and cutting storage 25%.
